Clinical Centrifuges

# Sprint™ 6H

Compatible tubes

The Sprint™ 6H is a compact centrifuge that includes a six position, swing-out rotor. Prior to centrifugation, tubes are loaded vertically. Once the centrifuge starts, tubes swing to a **horizontal** position, providing the flat-line separation that is commonly preferred for further analysis.

Designed for use with 10ml tubes (16 x 100mm), smaller tubes (12 x 75mm and 12 x 100mm) can be centrifuged using the optional adapters (item: C5000-ADP).

With intuitive controls and a large LED display, virtually no programming or setup is required prior to starting a cycle. Simply select the run time and press "START". The safety lid-lock is engaged and the rotor quickly and smoothly accelerates to 3,400 rpm. Once the run time is completed (or the "STOP" button is pressed) the rotor comes to a complete stop and the lid lock is disengaged for removal of samples.

# Sprint™ 8

Compatible tubes

The Sprint™ 8 includes an eight position, fixed angle rotor for the centrifugation of 10ml blood tubes (16 x 100mm), and 15ml conical tubes (17 x 120mm). Smaller blood tubes (12 x 75mm and 12 x 100mm) are also compatible with the use of optional adapters (C3100-ADP).

With intuitive controls and a large LED display, virtually no programming or setup is required prior to starting a cycle. Simply use the up/down buttons to select the run time and press "START". The safety lid-lock is engaged and the rotor quickly and smoothly accelerates to 3,400 rpm. Once the run time is completed (or the "STOP" button is pressed) the rotor comes to a complete stop and the lid lock is disengaged for removal of samples.

Ideal for Coag, PPP and urinalysis studies.

# Sprint™ 6H Plus

The Sprint™ 6H PLUS is our premium centrifuge offering providing horizontal (swing-out) centrifugation:

- Increased speed up to **4,000rpm / 2504xg**
- Back-lit, liquid crystal display
- Adjustable speed in increments of 100rpm
- Digital speed control in rpm or rcf
- Adjustable acceleration and deceleration levels
- A safety imbalance detection system
- Momentary operation
- High capacity rotor for tubes up to 15ml (conical or round bottom)

**6 x 15ml Horizontal (2504xg)**

In addition, the Sprint 6H PLUS offers an optional fixed-angle rotor for centrifugation of up to 12 tubes.

Ideal for Coag, PPP and urinalysis studies

# Sprint™ 8 Plus

**8 position fixed angle rotor (4445xg)**

Speed: 100 to 6,800rpm / 4,445 xg  
Capacity: Round: 8 x 15ml / 10ml / 7ml / 5ml  
Conical: 4 x 15ml conical up to 99hr. 59 mins. / cont.  
Timer: 1 to 99 hrs. 59 mins. / cont.  
Dimensions: 11 x 13.7 x 9.5 in.  
(W x D x H) (28 x 35 x 24 cm)  
Weight: 17.6 lbs / 8 kg  
Electrical: 120 or 230V, 50-60 Hz,  
Warranty: 2 years

Unlike traditional clinical centrifuges the increased speed capability (4445xg) of the Sprint™ 8 PLUS allows for the separation of serum or plasma in as little as 2-3 minutes. Additional features include:

- A large back-lit, liquid crystal display
- High capacity rotor, 8 tubes up to 15ml (conical or round bottom)
- Unique EZ-Scroll™ touch pad
- Timer up to 99hr 99mins. / continuous
- Storage of commonly used run-times
- Control of speed in in both rpm and rcf
- Adjustable acceleration and deceleration levels
- Safety imbalance detection system
- Momentary operation
- Electrical lid lock

Ideal for rapid production of serum and plasma
