

➤ Valve-Regulated Vacuum Pumps

Standard vacuum pumps can be controlled manually or via valve operated vacuum controllers

Rotavac Valve Tec

- Recommended for solvents with low or medium boiling points

Rotavac Valve Control

- Suction capacity for up to 3 rotary evaporators at the same time

Hei-VAC Pump

- Two-stage diaphragm pump

PC510 NT

- Recommended for medium-sized vacuum applications involving common solvents

PC3001 Vario Pro

- Optimizes vacuum conditions automatically by precisely and continuously adjusting the diaphragm pump's motor speed

Part Number	036306562	036306581
Condenser Part Number	n/a	n/a

➤ RPM-Regulated Vacuum Pumps

Standard vacuum pumps can be controlled manually or via valve operated vacuum controllers

Rotavac Vario Pumping Unit

- Three-stage diaphragm pump
- Precise vacuum control avoids bumping and eliminates foaming for your evaporation solution
- Due to automatic vacuum supply to the process parameter you have more time for important laboratory activities

Rotavac Vario Tec

- Two-stage diaphragm pump
- Recommended for solvents with low or medium boiling points

Rotavac Vario Control

- Three-stage diaphragm pump
- Even if the gas ballast valve is open an excellent ultimate vacuum is reached when working with easily condensable vapors. This makes distilling high boiling point solvents such as DMF or DMSO possible at low bath temperatures
